Skills: HTML/CSS/TailwindCSS/React/React Native

Education

Tartu Tamme Gümnaasium

Infotechnology course

Est. Graduation

Jun 2023

Projects

Expense Tracker App

- Developed a React Native app that makes tracking expenses and income easier. Expenses and incomes can be categorized and the total of a category is calculated and displayed.
- User data is stored on Google Firestore along with authenticating themselves via Firebase.

Random Activity App

- Engineered a React Native app that uses a random activity API to fetch random or filtered activities based on user input and display them to the user. The activity can then be saved, completed or deleted.
- Used Async Storage and Context API in order to store saved and completed activities.

Real-Time Cryptocurrency Tracker

- Engineered a React Native app in order to track real-time cryptocurrency prices by importing the data from a cryptocurrency API. The user can buy coins with virtual money.
- Saved assets are stored using AsyncStorage and Recoil.

Experience

Chemmy [link to project](#)

Web App

Jun 2022

- Worked in a team of 4 to create a chemistry based learning game for a school project.
- Used plain JavaScript to create an element electron layer based game with multiple levels.

Lohkva Sports Hall Website (ongoing) [link to project](#)

Website

- Working with a client to make a website for a sports hall to book visits, games and trainings.
- Used WordPress to design the website and enhance user experience.
